

Jacquet Weston Engineering

The 24" Jumbo Barrel Plating Unit

The 'Jumbo' barrel unit has a 24in hexagonal polypropylene barrel fitting into a mild steel tank, with immersed anode rail. It can also be supplied with a rubber or plastic lined tank, with a modified anode rail which is above solution level.

Features

The polypropylene barrel will withstand temperatures up to 70°C. Suitable for most electroplating processes, except chrome. All bearings easily replaced. Off-the-shelf spares.

SPECIFICATION

Tank:

8 gauge, mild steel and/or mild steel rubber lined/plastic lined.

Length: 89cm(39in)

Width: 111cm(43)

Depth: 76cm(30in)

Overall dimensions

Length: 148cm(4ft 9in)

Width: 109cm(3ft 7in)

Depth 173cm(5ft 8in)

Tank fitted with:

Barrel drive motor unit,
0.125hp, 380/400 or 400/440
volts, 3 phase, 50 cycles, MEM
starter.

Electroplating Barrel:

61cm (24in) hexagonal with
20cm (8in) sides. Manufactured
in polypropylene 10mm (3/8in)
sheet with 3mm (1/8in)
diameter holes. Contacts,
95mm cable with hose
protection.

Robust mild steel chute and gear guard.

Finish: Chlorinated rubber paint.
